### PLIŠASTI DINOZAVER ZJALCA PLUSH DINOSAUR MISSY

Lutko odlikujejo ročna izdelava in natančno izdelani detajli. Nastala je v sodelovanju z Geoparkom Idrija. Zgodba Zjalce je povezana s predhodnikom dinozavra, ki je pred več kot 200 milijoni let v blatu na nekdanji morski obali pustil stopinje, ki so danes vidne v okolici Godoviča.

*The handmade doll is characterised by its craftsmanship and meticulous details. It was created in cooperation with Geopark Idrija. The story of Missy is linked to a dinosaur predecessor: more than 200 million years ago, it left footprints in the mud on the ancient seashore that are visible today in the Godovič area.*
